İZMİR KALIP started its activities with 4 employees in 100m² closed area in Izmir Industrial Area in 1992.

By expanding its production area to 600m² in 1998, the company specialized in Progressive mold making. Widening its horizons by the help of CAD-CAM investments, the company started manufacturing molds and supplying sheet parts in White Goods and Automotive Sector.

In 2002, the company moved to its factory located in 5.000m² area in Manisa Organized Industrial Zone.

In 2014, İZMİR KALIP moved to its newly-constructed factory located in 16.750m² area in Manisa Organized Industrial Zone and continued its adventure as EKSA KALIP for a while due to the change in its partnership structure. Afterwards, the company retrieved its real name as of 2016.

İZMİR KALIP meets customer requirements by means of its wide machine and equipment track offering advanced technology, can perform 3 dimensional design and analysis before production, and assure its productions three-dimensionally. In accordance with customer requirements, enhancing its product range and variety day by day, our company experiences the pride of offering service to our customers by incorporating grouping and welding processes. İZMİR KALIP continues to grow and develop itself with its 190 employees. We experience the pride of being a reliable subsidiary industry in terms of offering our customers the desired quality mold and sheet materials needed in the industries of white goods particularly,

- Heating and Cooling,
- Electrics and Electronics,
- Automotive
- Panel Radiator.

Our Mission

To be a company creating value in Sheet Molding and Shaping for Our Country and Customers.

Our vision

To be preferred in Sheet Molding and Shaping Market As a Brand.

MOLDING PLANT

Having 16 CNC counters and 110.000 machine/hour processing capacity, our Molding Plant produces especially progressive, transfer, tandem, and manual molds up to 4.200mm thickness for white appliances, heating cooling, electrics-electronics, and automotive industries. With ERP Program, the whole process is tracked over calculated routes and project calendars are shared with our customers daily. With our experienced team, our plant is a technology center and a solution partner providing a complete service from feasibility to arrival contract at home and abroad as well as following industrial developments and news.

PRESS PLANT

With our 18 press machines, our Press Plant is continuing to grow and develop itself and our customers. Our plant is in service for providing sheet metal materials especially needed in white appliances industry, heating and cooling, electricity and automotive industries to our customers in desired quality.

Our firm shipped approximately 25 million pieces to our customers by processing 13 thousand tons of sheet metal in 2016.

We can momentarily measure our productivity thanks to 'IPS' program specially designed for our firm on our existing ERP system. Moreover, this program allows us to perform Online Process Tracking with all departments.

Having a press section from 120 tons to 800 tons, we have the capacity to form 340.000.000 stroke sheet metal in the range of 0.3mm – 6mm thickness.

QUALITY

İzmir Kalıp Quality Department executes planned and systematic activities to provide adequate confidence in fulfilling a product's or service's specified requirements. We can give confirmation for parts/pieces online by means of 'ERP' program as well as working in cooperation with customers by determining customer requirements in advance.

Quality Department aims to:

- Consider the whole system as processes chain directly or indirectly affecting the quality,
- Ensure quality continuity and launch initiatives to ensure aimed quality level is obtained in the most effective way,
- Comply with standards and take necessary measures by continuously tracking results.

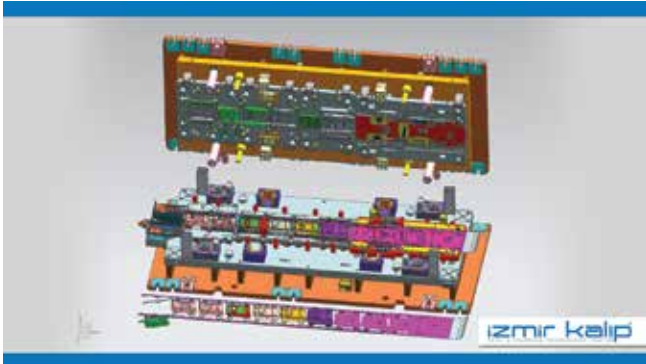

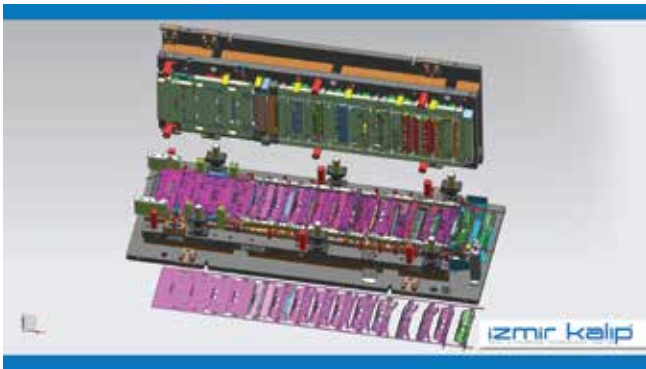

As İzmir Kalıp, we perform production in accordance with ISO 9001:2008 International Systems. 8-person team in Quality Department adopts 'High Quality, Zero Error' understanding.

In İzmir Kalıp, Quality Control is ensured individually and separately for each production process. Therefore, errors in each process is detected on-site thus, the next process starts with products 'Quality Control Approved'.

MOLD DESIGN ENGINEERING

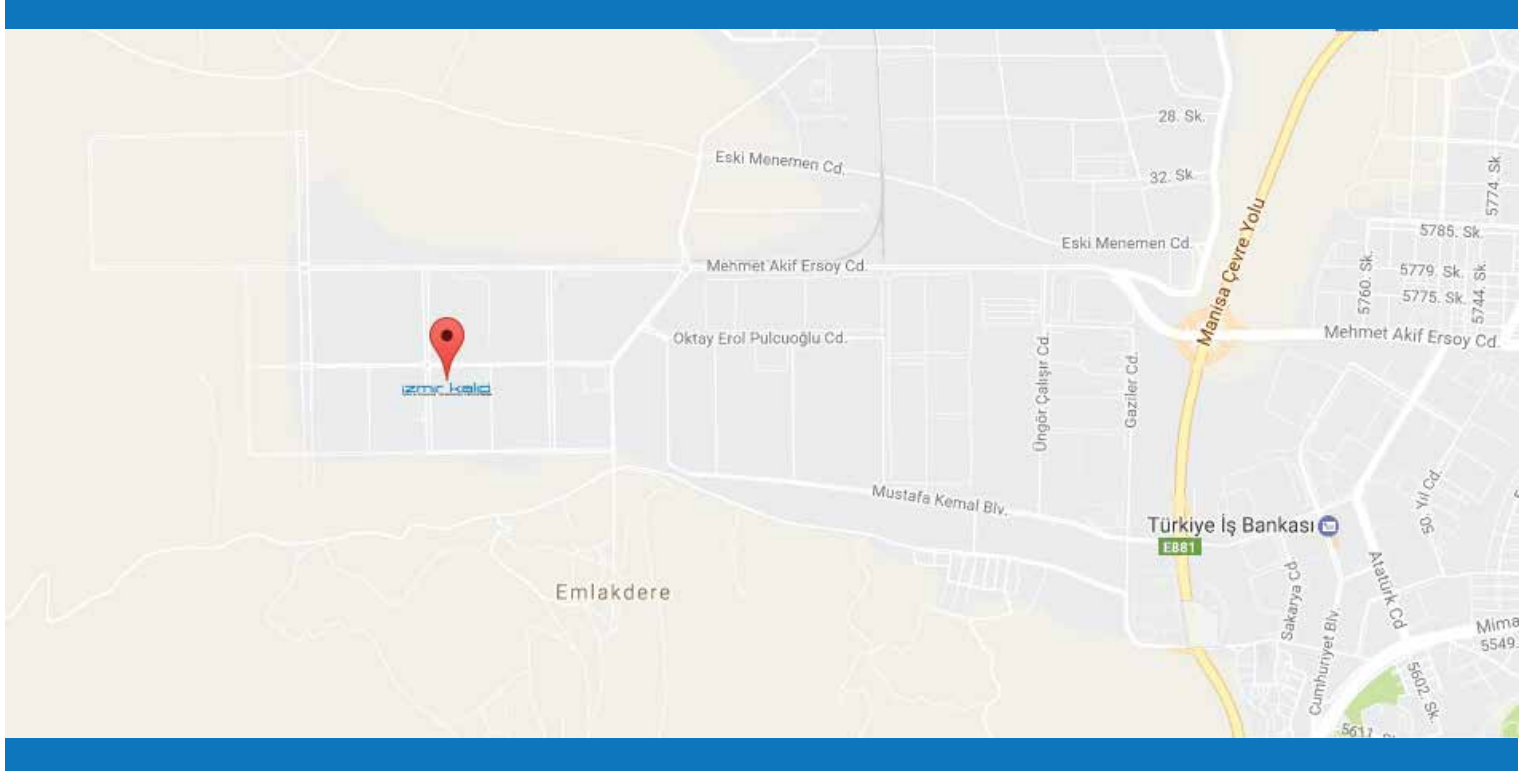

With 25-year experience, İzmir Kalip creates 3D designs by means of NX – 9 program in accordance with 'Design Standards by İzmir Kalip' or 'Mold Design Standards by Customer'. Having 14 stations, our Mold Design Engineering Department uses AUTOCAD, CATIA, ZW3D programs and EXPRESSUS Motion Analysis & Simulation program.

WELDING AND MOUNTING

With our experienced employees, we professionally perform welding sheet metals placed in welding fixture and sheet metal pieces, and mounting works with screws, nuts, rivets, and pins.
